British Values in Geography at Bisley Blue Coat C of E Primary School

Rule of Law

In geography, children follow rules in our classroom to ensure it is a safe place to be. They respect the resources we use and listen to others. Children understand that different countries have their own rules that they follow. They will begin to understand rules related to global trade and international relationships.

Individual Liberty

In geography, when comparing and contrasting locations children will also explore the people living in these environments and their own individual liberties. Children will have the freedom of making their own choices and decisions about the world, forming their own opinions about places whilst being respectful of others.

Democracy

In geography, children have respect for their fellow pupils and encourage each other to have the confidence to express their ideas and opinions regarding geographical issues such as pollution, environmental issues, water and globalisation.

Tolerance of others with different faiths and beliefs

In geography, children will consider questions regarding how different cultures live and work throughout the world. Children have the opportunity to explore how areas have changed and how the diverse needs in society has changed them.

Mutual Respect

Mutual respect is taught and given when children are expressing their opinions and beliefs about different geographical parts of the world and societies within in them. Children are taught and encouraged to show respect to each other's beliefs, feelings and opinions with the expectation that these must be listened to.
