British Values in Maths at Bisley Blue Coat C of E Primary School

Rule of Law

Our children know that laws mean rules that should not be broken. They develop an understanding of rules in Maths such as the law of commutativity and growing from there. Children understand that these rules must be applied as would the laws of the land.

Individual Liberty

Children are encouraged to use a range of methods to solve various problems in Maths. They are encouraged to use their own judgement when choosing an effective method. All methods are respected and valued.

Democracy

Through Maths lessons, children gain the knowledge of how statistics work. We compare quantities and complete tables and graphs to show data. Children are encouraged to democratically collect accurate data to be represented.

Tolerance of others with different faiths and beliefs

All children are included in all Maths lessons, regardless of faith or belief.

Mutual Respect

There are many opportunities for children to discuss their work and to reason their answers in Maths lessons. Children are taught to respect and value each other's responses.
